

CORESHORTS™

To: **Whom it may Concern**

Date: _____

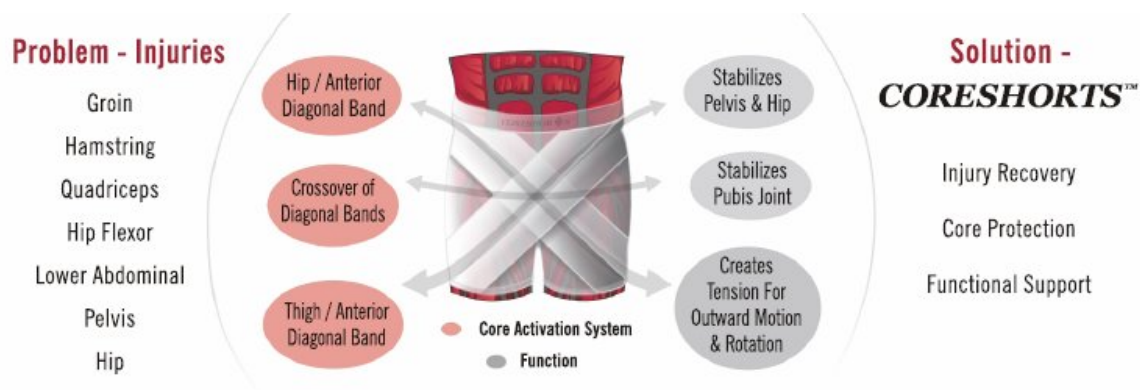

From: _____

Patient: _____ Dx: _____

Subject: **CORESHORTS**

I am providing this letter to provide a **referral** for a new low back, pelvic and hip support system called Coreshorts.

Coreshorts is the only product to address the back, pelvis and hip as a single functional unit.

Coreshorts is classified as a **Soft Orthotic Bracing Device** which provides pelvic stability for low back and pelvic conditions such as, lumbo-sacral dysfunction, sacro-iliac joint laxity, osteitis pubis, hernia repair, hip arthritis (THR) and groin injury recovery.

Two medical grade versions are available;

Coreshorts Pro - has a compression rating of **20 – 30 mmHg** which is comparable to a soft back brace and sacro-iliac joint belt. This version is to assist in injury recovery and allow a safer durable return to activities along with a Rehab program.

Coreshorts Rehab – has a compression rating of **30 - 40 mmHg** to maximize low back and pelvic stabilization to assist in acute or chronic trauma recovery. The rehab version is primarily for those who need a complete stability system to assist in rehabilitation and a functional return to activities.

Recommend: **Coreshorts Pro**_____ **Coreshorts Rehab**_____
